

'FCC Intermediate: Quote Generator

[Project Page](#)

Overview:

You would like to practice creating a minimalist web page that will pull random quotes and allow users to share the quotes they like. Project does not require the use of any CSS system however will be graded with CSS quality expected.

Site is expected to be minimalist. Keep clutter minimal, each element should have a purpose.

Grading items

Minimal Requirements

- ☐ Minimalistic design
- ☐ A section to hold the quotes
- ☐ A button to generate a new quote
- ☐ A button to share the quote to a social media page (must work)
- ☐ Quote sources:
 - ☐ For minimal grade the quotes do not have to come from a remote API. see additional challenges.

Additional Challenges

- ☐ Source should come from a quote API. No further requirements on what kind of quotes come from the API
- ☐ Add a second social media share button that works.

Hacker Challenges

- ☐ **Level 1**
 - ☐ Give some sort of design flair for when the user generates a quote. Be creative.
 - ☐ Quote api should have some sort of theme and have your site reflect that theme.
- ☐ **Level 2 option a**
 - ☐ Create a second generate button that will pull from a separate source for a different type of quote.
 - ☐ Theme of the site should change to reflect the quote source.
- ☐ **Level 2 option b**

- ☐ Add a text field. Allow the user to enter a topic or keyword that the api will use to generate a quote based on the word(s) entered. This will involve finding an API that allows this and what can be entered will be based on the API.
- ☐ Text field should have validation on it or at least provide an error if the item entered returned no quote results
